

UCLA Dark Matter 2020 Conference

Thursday 26 March 2020

Session 6: Astrophysics and cosmology-2 - PAB- 1-425 (10:25 - 11:40)

time	[id] title	presenter
10:25	[21] The Hubble tension: implications for dark matter and dark energy	ARENDSE, Nikki
10:40	[8] Milky Way Satellites: Probes of Dark Matter Microphysics	NADLER, ethan
10:55	[19] Can tides disrupt cold dark matter subhaloes?	ERRANI, Raphaël
11:10	[18] Implications of the Gaia anisotropic substructure for direct detection	BOZORGNIA, Nassim
11:25	[25] Sterile neutrino mass and mixing from cosmology and laboratory searches	HAGSTOTZ, Steffen
