

Neutrino Geoscience 2019 Prague

Monday 21 October 2019

Poster session: Poster session - Room 319 (3rd floor) (17:30-19:30)

time	[id] title	presenter
17:30	[46] Heat flow from the core and the thermal evolution of the Earth	PATOČKA, Vojtěch
17:30	[41] Crustal density structure of South China and South China Sea	Dr XU, Ya
17:30	[36] Analysis Strategies for the Updated Geoneutrino Measurement with Borexino:	Ms KUMARAN, Sindhujha
17:30	[31] Ocean Bottom Detector : toward direct measurement of mantle geoneutrinos	WATANABE, Hiroko Dr UEKI, Kenta
17:30	[18] Effect of the overburden on the geoneutrino signal at SNO+	Dr STRATI, Virginia
17:30	[21] Geoneutrino measurements with Borexino: implications for geoscience	Prof. MANTOVANI (ON BEHALF OF BOREXINO COLLABORATION), Fabio
17:30	[13] Probing the Earth Core Composition with Neutrino Oscillation Tomography	VAN ELEWYCK, Veronique
