## The Nuclear Physics Program at TRIUMF

*Thursday 5 December 2019 10:00 (30 minutes)*

The ISAC radioactive facility at TRIUMF supports a wide range of nuclear physics, including tests of fundamental physics and symmetries, nuclear astrophysics and applied programs. The ARIEL upgrade program will enable new and more research opportunities. The talk will provide an overview of current program and future opportunities, as well as the status of the ARIEL project

**Author:** Prof. DILLING, Jens (TRIUMF and University of British Columbia)

**Presenter:** Prof. DILLING, Jens (TRIUMF and University of British Columbia)

**Session Classification:** ISOLDE and its sister facilities
