

The AION Project

Monday 22 July 2019 14:40 (30 minutes)

The UK Atom Interferometry Observatory and Network (AION) project in the UK proposes a series of atom interferometers with baselines of 10m, 100m, and 1km, similar to MAGIS. The first stage would be located in Oxford, with sites for the subsequent steps awaiting study. <http://www.hep.ph.ic.ac.uk/AION-Project/>

Presenter: BUCHMULLER, Oliver (Imperial College (GB))

Session Classification: Towards Space: Review of Terrestrial Projects
