Technical Assignment 5

PHY410: Do problems 1 and 2
PHY 505: Do all three problems.

Accept the assignment from github classroom: https://classroom.github.com/a/G_Xgi82C. You will then get a link to your own github area. You should submit your code through github classroom. Submit your writeup, and a link to your github classroom area where your code is, on UBLearns.

Follow the instructions here:
https://github.com/rappoccio/CompPhysNumpyExamples

Time to get fancier! The problems are jupyter notebooks named “Problem1”, “Problem2”, and “Problem3”. Follow the directions in the starter code area above! They will also appear in your assignment area after it is cloned.
