

# **Applied Antineutrino Physics 2019**

Thursday, December 5, 2019 - Sunday, December 8, 2019

Zhesheng Hall, Sun Yat-sen University

## **Book of Abstracts**

# Contents

Welcome . . . . .	1
General information . . . . .	1
Questions of flavour . . . . .	1
Antineutrinos for Safeguarding Nuclear Waste . . . . .	1
The DPRK nuclear dilemma and China's countermeasures (XXXXXXXXXXXX) . . . . .	1
Sterile neutrino oscillometry with Jinping . . . . .	1
AIT & WATCHMAN . . . . .	1
The RED-100 experiment . . . . .	1
Status and Latest Results of the CHANDLER Project . . . . .	2
Reactor Monitoring with the DANSS Antineutrino Detector . . . . .	2
Measurement of reactor neutrinos using plastic scintillator array on the ground . . . . .	2
Reactor Antineutrino Detector Development at LLNL using PSD capable Plastic Scintillators with Li-6 Doping . . . . .	2
Meeting summary . . . . .	2
Next meeting & closing remarks . . . . .	2
Opening speech . . . . .	2
Contributions of Non-Fuel Antineutrinos at the High Flux Isotope Reactor . . . . .	3
Present status of experiment Neutrino-4 . . . . .	3
Prospects of experiment Neutrino-4 . . . . .	3
Reactor antineutrino measurement at Daya Bay . . . . .	3
Results and Updates from the PROSPECT Experiment . . . . .	3
Neutrinoless double beta decay and the challenge it poses for nuclear physics . . . . .	3
Constraints on solar $dm^2$ using 4000 days of short baseline reactor neutrino data . . . . .	3
Update on the IUPAP Neutrino Panel . . . . .	3

Sensitivity and Discovery Potential of WATCHMAN . . . . .	4
Status of JUNO . . . . .	4
CEvNS for safeguards . . . . .	4
Recent results from RENO . . . . .	4
Status of NEOS . . . . .	4
Accurate measurement of reactor neutrinos close to surface with STEREO . . . . .	4
Updates of SoLiD experiment . . . . .	4
Double Chooz Latest Results . . . . .	5
Development of realistic uncertainties in the summation method for nuclear reactor anti-neutrino applications . . . . .	5
Uncertainty study in analyzing the reactor neutrino anomaly based on nuclear structure physics . . . . .	5
CAEN for neutrino physics experiments. DAQ solution and use cases . . . . .	5

2

## **Welcome**

3

## **General information**

4

## **Questions of flavour**

9

## **Antineutrinos for Safeguarding Nuclear Waste**

13

## **The DPRK nuclear dilemma and China's countermeasures (XXXXXXXXXXXXXXXX)**

17

## **Sterile neutrino oscillometry with Jinping**

18

## **AIT & WATCHMAN**

19

## **The RED-100 experiment**

20

## **Status and Latest Results of the CHANDLER Project**

21

## **Reactor Monitoring with the DANSS Antineutrino Detector**

22

## **Measurement of reactor neutrinos using plastic scintillator array on the ground**

23

## **Reactor Antineutrino Detector Development at LLNL using PSD capable Plastic Scintillators with Li-6 Doping**

24

## **Meeting summary**

25

## **Next meeting & closing remarks**

35

## **Opening speech**

36

**Contributions of Non-Fuel Antineutrinos at the High Flux Iso-  
tope Reactor**

37

**Present status of experiment Neutrino-4**

38

**Prospects of experiment Neutrino-4**

39

**Reactor antineutrino measurement at Daya Bay**

40

**Results and Updates from the PROSPECT Experiment**

41

**Neutrinoless double beta decay and the challenge it poses for nu-  
clear physics**

42

**Constraints on solar  $dm^2$  using 4000 days of short baseline reac-  
tor neutrino data**

43

## **Update on the IUPAP Neutrino Panel**

44

## **Sensitivity and Discovery Potential of WATCHMAN**

45

## **Status of JUNO**

46

## **CEvNS for safeguards**

47

## **Recent results from RENO**

48

## **Status of NEOS**

49

## **Accurate measurement of reactor neutrinos close to surface with STEREO**

50

## **Updates of SoLiD experiment**

51

**Double Chooz Latest Results**

52

**Development of realistic uncertainties in the summation method for nuclear reactor antineutrino applications**

53

**Uncertainty study in analyzing the reactor neutrino anomaly based on nuclear structure physics**

54

**CAEN for neutrino physics experiments. DAQ solution and use cases**
