Usage of SWAN with the CERN Open Data portal for education and outreach

Friday, 11 October 2019 16:55 (15 minutes)

The CERN Open Data portal provides access to a rapidly growing collection of data and software originating from the research at CERN. Included are as well documentation and examples, which makes the platform well suited for newcomers in the HEP community and the general public.
This talk presents how SWAN currently integrates into this ecosystem and discusses additional requirements for education and outreach.
