STEP INTO THE ERA OF SAFE DIGITALIZATION

We all know that technology and digital trends are transforming your environment. Because companies are facing with the uncertainty of customers, employees and competition.

Our 25 years worth of rich experiences in fields of information technologies, business informatics, utilities, finance and accounting proved us that tool to rediscover your business is the core: people, process and technology.

WHO ARE WE?

THE LEADING IT COMPANY IN SLOVENIA

The quality and reliability of software solutions, as well as state-of-the-art information technology for support of business processes, are our everyday obligations.

Primary activity is developing and supporting highly sophisticated software products for public services such as **water supply, waste management, remote heating, gas distribution, dwellings management undertakers, cable services...**

ISO 9001
BUREAU VERITAS
Certification

ACTIVE SINCE 1991

AND STILL AHEAD OF OUR TIME

Long term ongoing development and cooperation with experts lead to a solution that put us on the top of usability, functionality, security.

We are unmatched in the field of **communal economy, mass billing and complex systems.**

READY FOR YOUR BUSINESS

Processing and billing mass data of:

- Meters,
- Sensors (IoT, smart appliances,...),
- Smart cities, villages, ...

(condition, consumption, specification, ...)

Digitalization of your processes, papers and business.

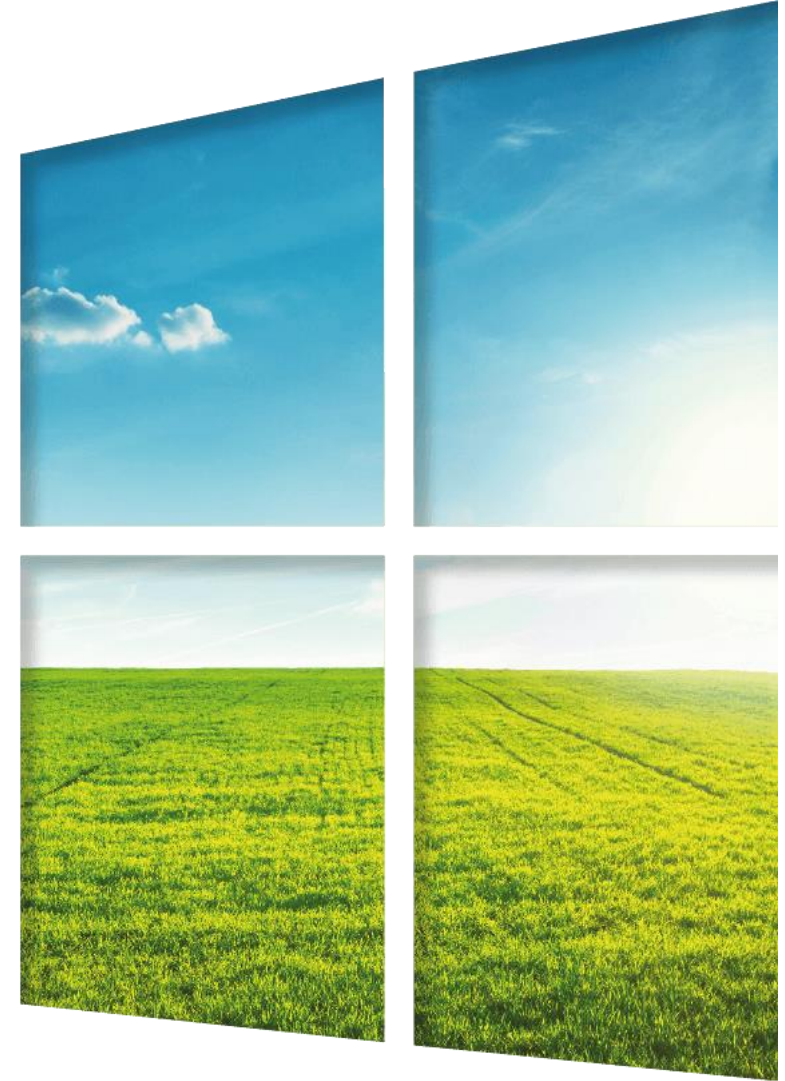

High value data presentation with efficient BI tools.

OUR MISSION

THE BASE FOR LONG TERM BUSINESS ORIENTATION

Our mission is to remain a leading information company and to spread to the domestic and foreign markets, especially in the areas of Smart Cities, optimization of mass data processing, IoT devices and all other advanced technologies.

We will continue providing the most advanced technologies in the forms of IT solutions in order to support our customer's business processes.

OUR VISION

THE BASE OF LONG TERM BUSINESS ORIENTATION

BASS d.o.o., Celje is already a significant solution provider on Slovenian market. To align to the market, company needs to spread its activities by merging with other niche players.

The role of leading solution provider for municipal maintenance and sanitation services raises importance for proactive appearance on markets outside Slovenia.

**For immense transformations
a change in mentality is
more crucial than change in
technology.**

OUR TEAM

SPECIALISTS THAT ARE PUSHING TOWARD THE COMMON GOAL

We have the best team of experts from different areas e.g. Accounting, Billing, Operations and Computer engineering which results in extremely scalable and user friendly software solutions for different industries and needs.

International and domestic education gives the team energy and the constant urge to stay fit in terms of competence, punctuality and maximum availability.

Together we process each idea and each proposal for the best possible experience for the user and us.

Daily challenges by our customers and constantly changing legislation, helps us grow and become valuable.

**We create value with
profound research and
improvement of core
challenges with a goal to find
the best possible solution.**
