

Achieved

Documented and reproduced training for DeepPFMET (*)

Added generator and reconstructed jets to training samples

Reminder: Project goal is to extend DeepPFMET (*), which calculates weights for each PFCandidate in the event based on DNNs to arrive at an improved p_T^{miss} estimation, to jets

(*) *working title*

Next steps

Add jets to loss function:

- add FastJet clustering
- try different loss function definitions
- evaluate impact on jets
