Page 1

- **Yesterday was running on Z->2mu with PFMuon Scouting to get an idea about timing**

- **Fixed PF Scouting Sequence bug, muons were not in event content**

- **Reconfigured HLT config to run on full L1 output in data**
  - **/store/data/Run2018D/EphemeralHLTPhysics1/RAW/**

- **Again made overall timing**
  - **Full Tracking: 750ms (250ms shorter than on Z2mu (?))**
  - **Pixel Only: 498ms**

- **Three modules building Rechits run the same thing (erase), hltParticleFlowRecHitHBHE* (ForEgamma,ForMuons,…)**

- **Got Adriano`s gpu track HLT-config customisation script, not yet working out of the box**
  - **To be scrutinised tomorrow**
