

FastJet in CUDA

Andrea Bocci, Abdulla Mohamed

Patatrack 7th Hackathon

- Problem
 - Make our FastJet implementation on GPU closer to the CPU performance.
- Achievements
 - Fixed some bugs.
 - Tried multiple optimizations (**No significant improvements in processing single event**).
 - Utilize the full GPU instead on one event at a time (**Promising (300 events ~ 450 ms GPU ~794 ms CPU) but it fails for large number of events**).

of particles, N2Tiled and T4_grid
