

The Next 10 Years of the Web

Wednesday 4 September 2019 11:00 (40 minutes)

The Web is continuously evolving, and it's set to change in some pretty interesting ways in the near future, I'll talk about 2 technologies that I reckon are likely to have the biggest impact on how the Web works, key topics will be:

- How HTTP/2 and HTTP/3 will rewire the Web
- How WebAssembly will enable new classes of applications to migrate to the Web
- Predictions for the next decade of the Web!
