

WebFest 2019

Knowledge Exchange Workshop

“Let’s reinvent the wheel!”

- nobody

Who would you rather ask, if ...

you have a work related question?

- Google, aka the internet
- Your supervisor
- Somebody who has already worked on it**

Our targets

1. Duplication
2. Knowledge exchange between experts and non-experts
 - Experts are also experts in hiding
 - Contacting hidden experts is so much fun and time consuming
3. Duplication

WebFest 2019 follow-up project

Tagging and Scoring

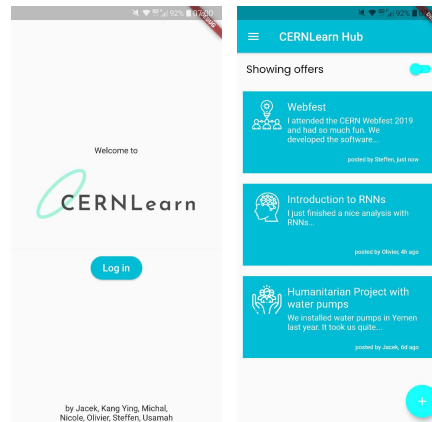

- Mining and crawling
- Graph Neural Network
- Minimal user input

[1]

Frontend

- Mobile- / Webapp
- CERN Phonebook
- You?

Show-stopper

1. OC11 and Privacy Protection
2. Critical user mass
3. The good old signal-to-background ratio aka false positive tags

Next steps

1. Proof of concept:
 - **Implement** tagging network to CERN Phonebook and
 - **Analyse** user statistics
2. More powerful back- / frontend
3. Take over the world (with our idea)

Next steps

1. Proof of concept:
 - **Implement** tagging network to CERN Phonebook and
 - **Analyse** user statistics
2. More powerful back- / frontend
3. Take over the world (with our idea)

Thank you

I attended the CERN Webfest 2019 and had so much fun. We developed the software you are currently using. The expertise I can offer is Flutter, Dart and a chat backend with CERN SSO. Please feel free to contact me for a coffee meeting.
