Session 1 : The cosmos as a particle detector (20:45 - 03:05)

time	[id] title	presenter
20:45	[10] The Planck experiment status and prospects	BOUCHET, François
21:20	[11] Supernovae status and prospects	RIGAULT, Mickael
21:55	[12] Weak lensing status and prospects	LEONARD, Danielle
22:30	Lunch break	
23:30	[13] Galaxy Clustering and BAO status and prospects	HOENEISEN, Bruce
00:05	[14] Gravitational Waves status and prospects	CADONATI, Laura
00:50	Coffee break	
01:20	[27] Gamma rays signature of dark matter in the CTA era	MORSELLI, Aldo
01:55	[28] Interplay between Cosmology, Particle Physics and Astrophysics	VINCENT, Aaron
02:30	[15] Multi-messengers astronomy status and prospects	HUMENSKY, Brian
