

HSF Packaging Group: Introduction

Graeme Stewart and Ben Morgan

2019-10-09

/cvmfs/sw.hsf.org

- We have liaised with the CVMFS team here at CERN, supported by CERN IT to setup a CVMFS area for the HSF
- This can be used for any software that we would like to make more widely available for testing
 - And eventually production!
- Software Tools group would like to use it to distribute builds of some performance analysis software, TAU
 - Which, it turns out, has both fairly complex dependencies and a Spack recipe
- Contact Graeme if you would like to get things deployed here
- At the moment the repository is available at CERN and anywhere that uses the CVMFS auto-configuration
- We have asked for it to be also made visible via the OSG and EGI production CVMFS setups

AOB

- HSF News and Meetings
 - Monday 14 October, 17h CERN time, [Software Tools WG meeting](#) on [TAU](#) (Tuning and Analysis Utilities)
 - Next HSF Workshop will be in Lund, Sweden 11-15 May 2020
- Next meeting
 - CHEP is probably a killer for an early November meeting (6 or 13)
 - Then suggest that we have a last meeting for 2019 in December (4 or 11)
 - As always, let Graeme and Ben know if there's anything you'd like to present
 - When people have an interesting topic we can always boot up a meeting!
