

# Global collaboration platform for Data Science

Jakub T. Mościcki, IT Storage

# Integrated Service for Data Science

Users **collaborate on data** using an increasing number of applications.

**Concurrent editing**

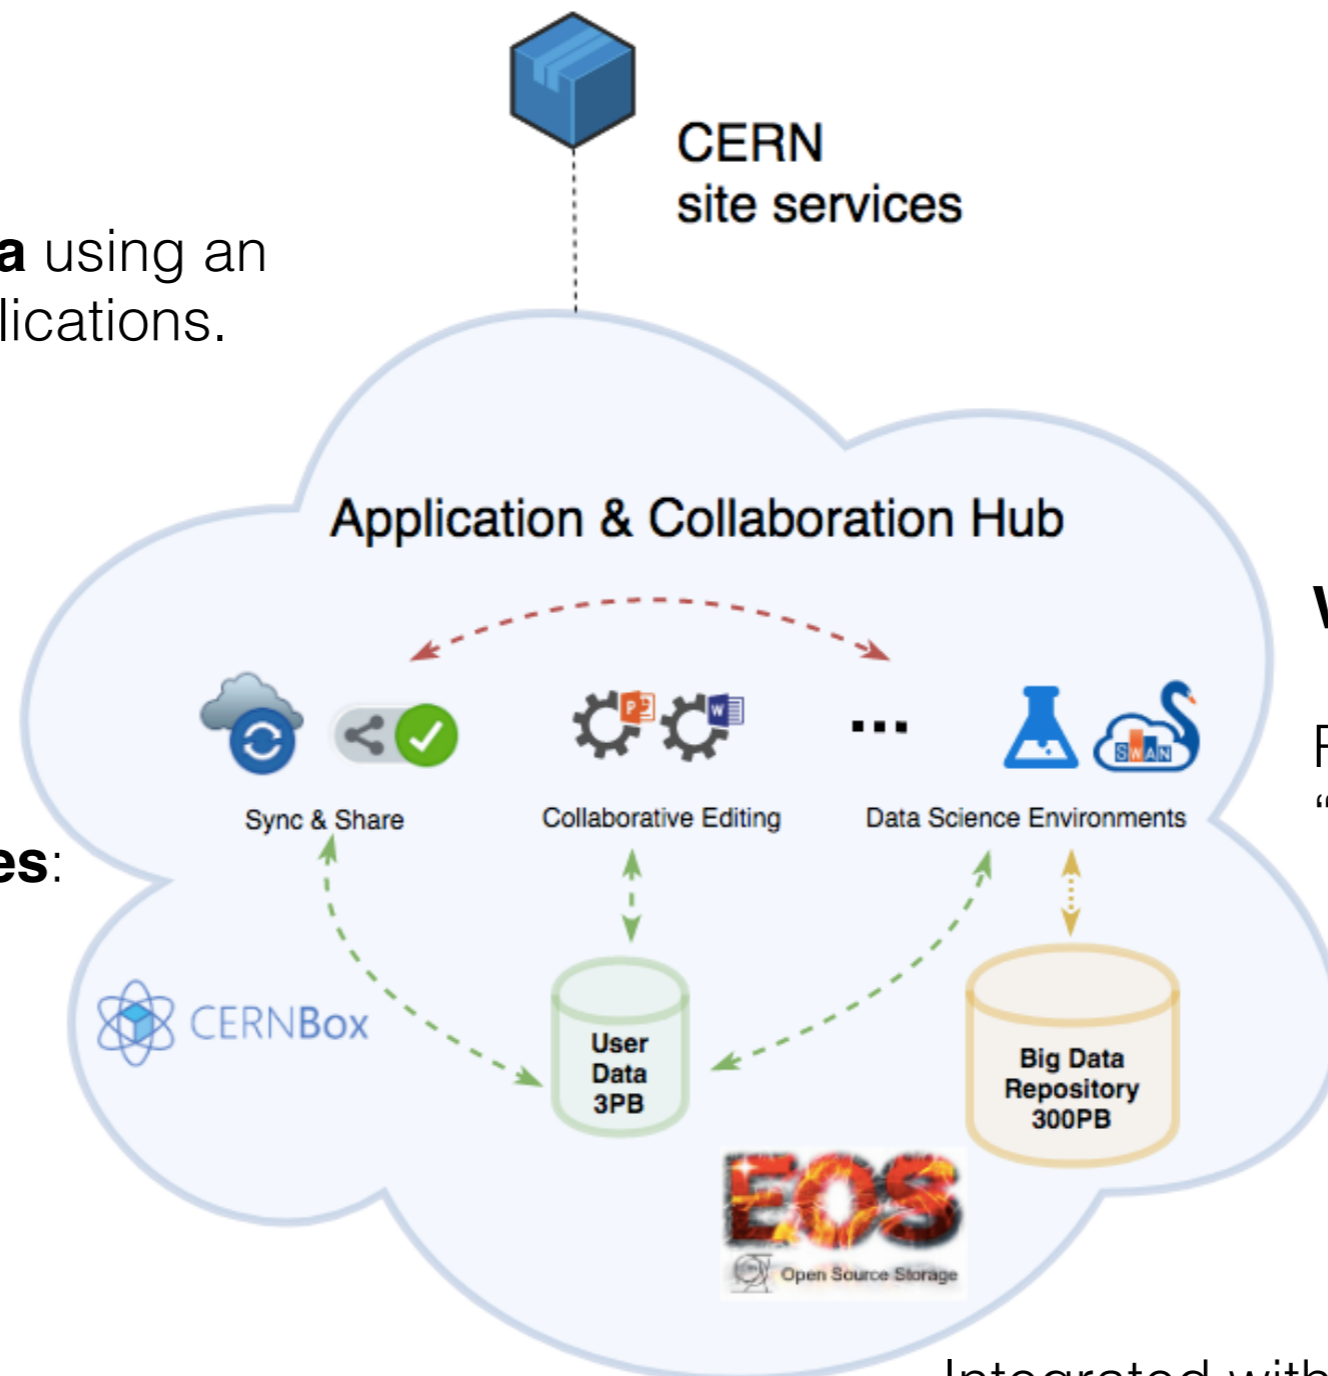

**Web-based Analysis**

Ready-to-go environment  
“one click away”

Data available on **all devices**:  
mobile, laptops, desktops

Data easily **sharable** with  
individuals and groups

Integrated with **entire data repository**

# Federated Analysis Platform

*Advancing state of the art*

**One-click** to create user groups, share projects and data

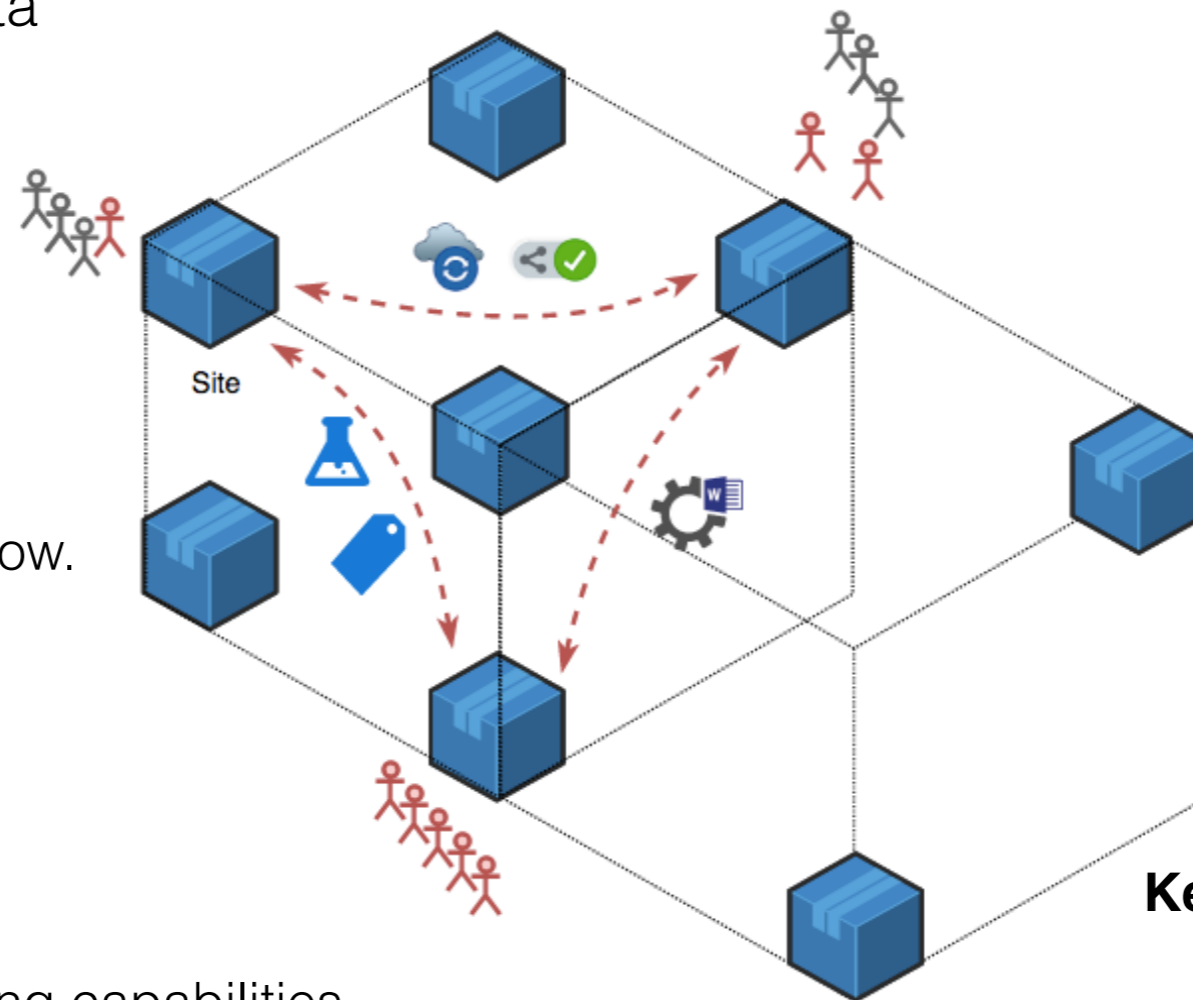

**Full metadata awareness** in the research workflow.

**Domestic and remote users** in the same collaborative workflow.

**Application&data** workflow.

Integrate distributed computing capabilities with data sharing systems.

**Keep the data at the source** if required (size or policy).

No need to export data to reach functionality.

# The Project:

- 12 partners to **create initial infrastructure**
  - connect existing, sustainable services
  - 200K+ existing users
- Deliver a **Global CS3 Collaboration Service** for European research, education and public institutions.
- **Provide a Community Collaboration Platform** on technology, applications, use-cases, software and operations in Europe, Australia and beyond.

Grant agreement ID: 863353

Status

Grant agreement signed

Start date

1 January 2020

End date

31 December 2022

Funded under:

H2020-EU.1.4.1.3.

Overall budget:

€ 5 956 696,25

EU contribution

€ 5 858 571,25

Coordinated by:

# Collaborative Workflows

*Integrate existing experience and technology*

Share, access, synchronize

Metadata&tagging, Open Data (OpenAIRE, Zenodo,...)

Data Science: Jupyter Notebooks (SWAN,...)

Concurrent editing

On-demand data transfers (Direct, FTS, DTN, Rucio ...)

# Interoperability

- Add thin layer on top of existing services

- Use existing fabric

- Use existing standards

- Introduce new APIs only if needed

- ScienceBox

- Close collaboration with industry

- Integrate into upstream products

Specs on gRPC + Protobuf  
Last mile distributed computing  
**Neutral-vendor APIS**  
**Regain user freedom**  
**Driven by you**

OPENCLOUDMESH

A vendor neutral standard under the GÉANT umbrella
