

Mediterranean Thematic Workshops in Advanced Molecular Imaging

Contribution ID: 16

Type: **not specified**

Round Table

Monday 5 September 2022 17:40 (35 minutes)

1. We have heard about outstanding medical research questions/needs, latest tracers and instrumentation developments. Which one is currently the weakest element in (a) the research and (b) clinical context and thus requires special attention?
2. Where do you see molecular imaging most strongly retain a significant advantage compared to other techniques, for example blood based biomarkers, MRI, etc?
3. What is your opinion about the utility of preclinical imaging? Where is it most impactful?

Topic Selection

Session Classification: Neuroinflammation and Preclinical

Track Classification: Preclinical
