Reflected Volumes: Usage

```
Rotation3D rot3D(RotationZYX(...));  
Position   pos3D(.....);  
if ( reflect )  
    rot3D = Rotation3D(1., 0., 0., 0., 1., 0., 0., 0., -1.) * rot3D;  
Transform3D tr(rot3D, pos3D);  
pv = assembly.placeVolume(volume,tr);
```

All magic inside here

Reflected Volumes: Geant4

DD4hep

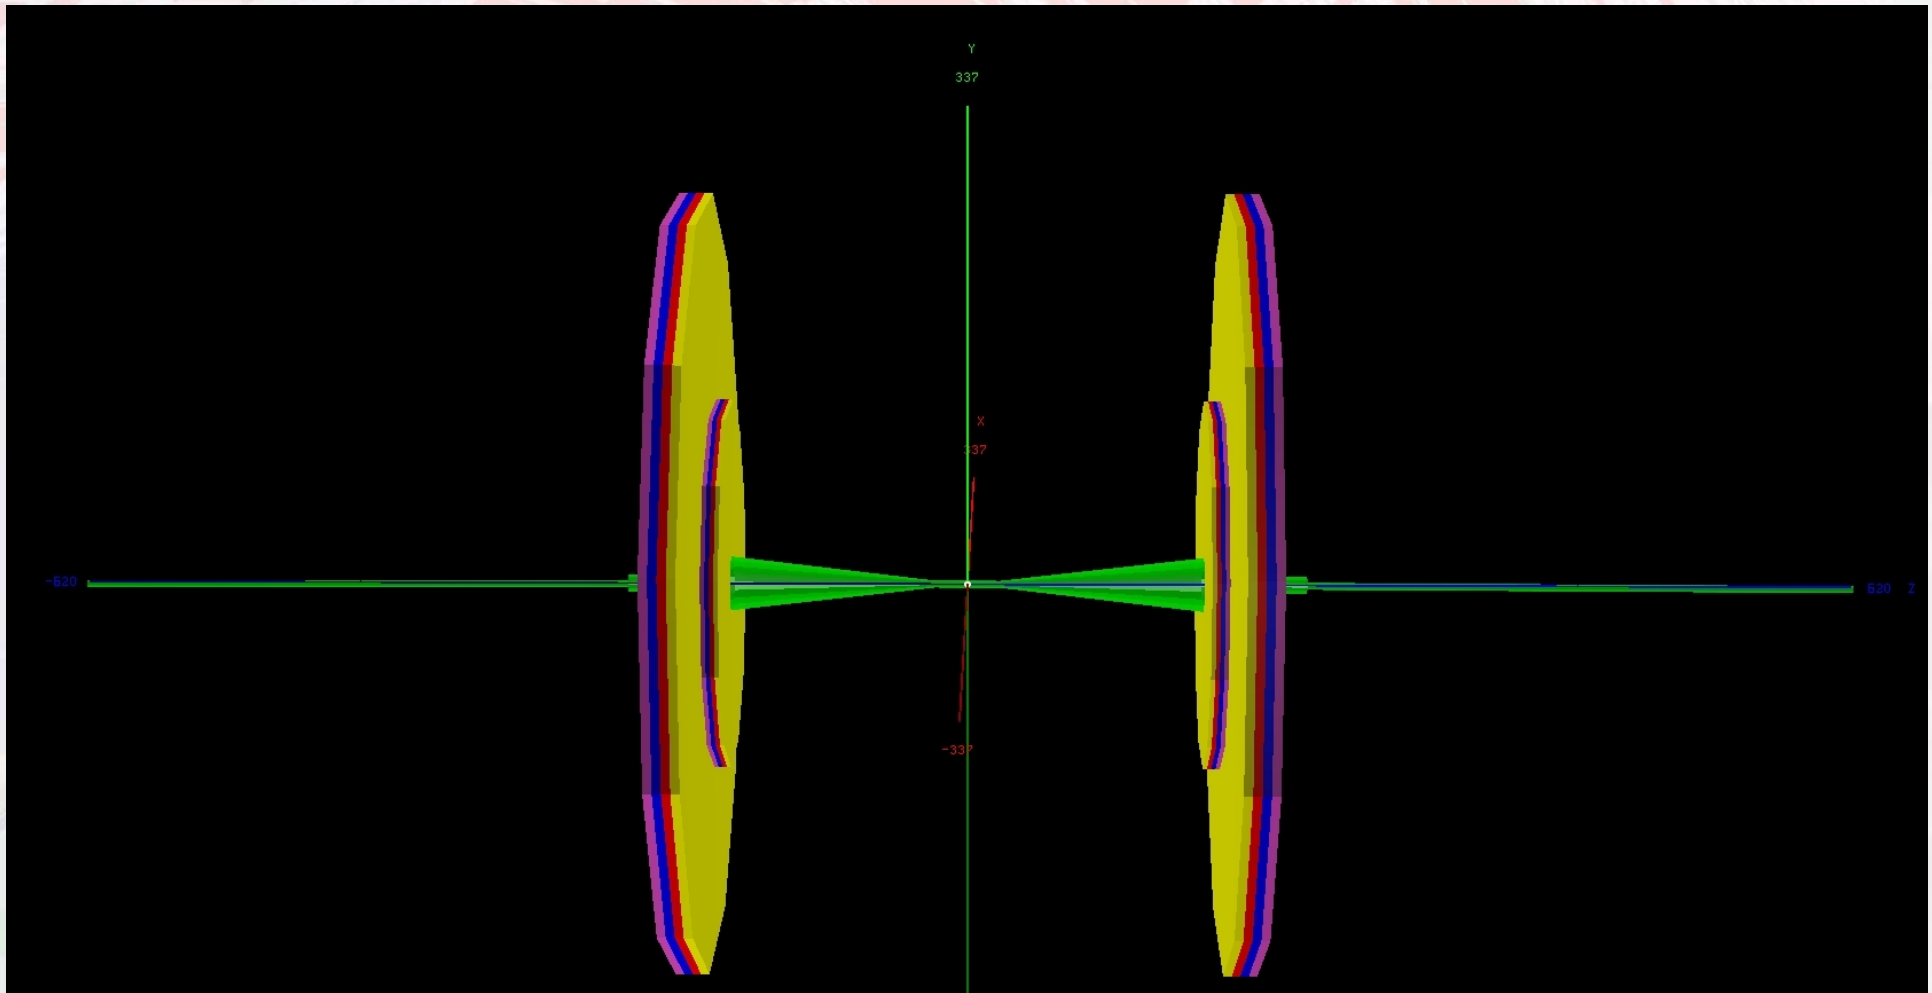

Reflected DetElements: Usage

```
DetElement det = ...;           // Some part of a detector
Transform3D refl_trafo(...); // Pure placement

auto reflected = det.reflect(name+"_reflected",x_det.id());
auto pv = assembly.placeVolume(reflected.second,
                               refl_trafo);
reflected.first.setPlacement(pv);
```
