Breaking Down the Statistics

So let's look at the statistics offered by Quora and how my view count has fluctuated over a three month period.

Month	Series 1	Series 2	Series 3
Oct	20	30	35
Nov	45	65	45
Dec	35	45	85
Jan	65	90	80
Feb	70	75	70
Mar	85	90	65
Apr	95	65	90
May	110	115	100

For some of you these numbers may not seem so big, but for me (a person that has never gone viral), it's quite the wow factor. The first thing that I would like to point out is that a post on [Quora](#) has a longer lifespan than most other platforms.

How We Managed to Get 325K Views on Quora in Only 3 Months

We started using Quora about four months ago with the purpose of promoting Medium content, and especially the content published in my publication. I've seen that Quora is not only a more professional platform, but it's also filled with people that are hungry for new knowledge and that are enthusiastic to share their own knowledge with others.

A big enough part of my success does come from Quora as it has pushed my content to a larger audience.

In this article, I'll break down how I've managed to gain over 325,000 views in only three months and how I actively manage over 100,000 views monthly.
