

# Organising for TNC20 report

Internet2 TechEx, New Orleans

December 8<sup>th</sup>, 2019

David Kelsey, STFC, UK Research and Innovation

## TNC20 report – main aim(s)

- Gather and analyse feedback of Impact of FIM4Rv2

### Other possible topics

- Updates from research communities?
- Updates from Infrastructures and other providers?
- New requirements/recommendations identified?

## What will this new report be used for?

- Keep FIM4R and the issues alive – keep up the pressure!
- Will it be an important ingredient to achieving future funding (US and EU)?
- If so, what does it need to include?

## Authors of the paper?

- All interviewers?
- Just those involved in the analysis of responses or provides other input
- Do we include interviewees?

# Timetable

- Finalise structure and contents before next FIM4R (at TIIME 2020), i.e. by end of Jan 2020
- We need to do the interviews
  - how many can we do before end of Jan?
- We need volunteers
  
- Need to have good final draft by end of May 2020
- TNC20 is 8-12 June 2020
  
- Can present close-to-final draft at REFEDS/TNC20
- Then publish paper in July 2020 as before (Zenodo)
  
- General approach - an editorial team with regular video meetings worked well in 2018

## Strawman – possible document structure

- Introduction – what is the paper all about?
- Reminder - The FIM4Rv2 paper, recommendations and requirements
- News/updates since summer 2018 (communities, infrastructures, federations, funding)
- Impact of FIM4Rv2?
  - How did we do our analysis?
  - e.g. Show feedback at TNC19, and the FIM4R workshops and describe the interviews
- Summary of main findings
- Conclusions and next steps
