

# EDM4HEP Meeting #5

## Introduction

---

Graeme A Stewart

HEP Software Foundation

2019-10-29

# Progress since our last meeting

- GitHub repo has been renamed to respect the agreed capitalisation convention
  - <https://github.com/HSF/EDM4hep>
  - The old path seems to work ok still...
- Bunch of commits went in
  - Build script fixes (for PODIO use) and capitalisation convention
- Few open PRs from Valentin
  - TrackEDM is the important one, <https://github.com/HSF/EDM4hep/pull/19>

# Planning...

- Today
  - Continue review what we have so far
  - Continue on discussion of EDM4HEP and 'core' items
  - As ever, notes and queries in our live markdown
    - [https://codimd.web.cern.ch/NtMOGIENRFG5Wc\\_bAn\\_sxA?both](https://codimd.web.cern.ch/NtMOGIENRFG5Wc_bAn_sxA?both)
- Identify issues for any more focused discussion
  - Discussion with Acts team - Valentin was following up
- Next meeting after CHEP...
  - I have a horribly constrained November, so no Tuesday will work for me :-)
  - Thursday 21 or Friday 22 November are actually just about the only days I have free
  - Doodle and if needed someone else runs the meeting...
