

## Matters arising

## RadWG – 3 March 2010

Proposal for the next meeting

- Thursday 25 March (week 13)
- WorldFip development road map discussion (Javier Serrano)
- Discussion with RP for the LHC electronics
- RadMon thermal sensitivity
- Opened to other suggestions

Antonio Marin (Survey) would like to discuss the stepping motor drivers' sensitivity

- Have you tested in radiation some of the [components](#) from the provided SMD list?
- Is radiation testing required or is it better to relocate the crate directly?

R2E Workshop will be organized in May 2010

- Doodle poll opened ([link](#))
- In order to have input on cross sections of the most sensitive equipment from the alcoves before the WShop, irradiation tests are planned with early LHC beam
  - UJ22 should be used as test area profiting from the TED and/or TCDIs
