

Phenomenology 2020 Symposium

Tuesday 5 May 2020

QCD & EW III (16:30 - 18:30)

-Conveners: Tobias Neumann

time	[id] title	presenter
16:30	[875] On the Validity of SMEFT Studies: VH and VV Production	LANE, Samuel
16:45	[952] Removing Flat Directions in SMEFT Fits: Complementing the LHC with polarized EIC Data	WIEGAND, Daniel
17:00	[895] Simulating Multi-Jet Events at Hadron Colliders using Forward Branching Phase Space Generators	FIGY, Terrance
17:15	[948] Measurements of inclusive multi-boson production at ATLAS	CORPE, Louie Dartmoor
17:30	[922] Precision measurements of W and Z boson production at ATLAS	SOLOVYEV, Victor
17:45	[913] Jet and Photon Measurements using the ATLAS detector	ALVAREZ ESTEVEZ, Manuel
18:00	[873] Precision Predictions at N3LO	MISTLBERGER, Bernhard
18:15	-
