## The Inert Doublet Model at current and future colliders (15' + 5')

*Tuesday, June 2, 2020 4:20 PM (20 minutes)*

I will discuss the Inert Doublet Model, a Two Higgs Doublet Model with an exact  $Z_2$  symmetry that provides a dark matter candidate. I will elaborate on current constraints on the parameter space as well as discovery prospects at current and future colliders.
