

DM@LHC 2020 is almost over...

- We are extremely glad that we decided to go ahead with the online-only version in spite of the difficult circumstances
- It is hugely important to facilitate the exchange of exciting new results and discussion of novel ideas in these times of isolation and travel restrictions
- We are grateful for all the encouragement, suggestions and support that helped make this meeting a success!

Thanks to all speakers, conveners and participants!

+ many more connecting to individual sessions and joining the discussions on Zoom and Mattermost

Please send us your feedback!

- Online-only conferences are still quite new, but will likely stay with us for a while
- We'd really like to know whether you liked the format and what can be improved
- We'll circulate a feedback form via email – please take a few minutes to share your thoughts
- The lessons learned will be shared with the community to help others organise similar meetings
- Your feedback will also help the organisers of the next real-life edition of DM@LHC

DM@LHC2020/1

1- 4 June 2021

DESY, Hamburg
