## State of LHCb for the Test

*Friday 27 January 2006 11:10 (20 minutes)*

During the sector test the beam has to cross IP8 and the vacuum continuity must be ensured through the experiment. The installation schedule of the experiment will be presented and the possible mutual interferences with the sector test highlighted. The temporary layout of IP8 and the vacuum conditions for this test in the region IP8 will be shown.
