

Workshop Chamonix XV

Contribution ID: 91

Type: **not specified**

Global hardware status

Friday 27 January 2006 09:25 (20 minutes)

Starting from the TI8 dump (TED) up to the end of the continuous cryostat in IP7, the availability in the tunnel of all components in the beam line e.g. the vacuum, cryogenic, collimation, protection devices, beam instrumentation and magnet systems will be reviewed. The impact of delays and potential limitations will also be presented.
