ATB Commitments and Major Issues

Tuesday 24 January 2006 09:00 (20 minutes)

This presentation will state ATB responsibility and organisation for LHC collimation. It will also present ATB commitments on the requirements listed in the 2 previous sessions. In particular, it will address the collimation system functionality and performance expected for the different operation stages and the procedures and tests to be put in place to reach these objectives.

Finally, current major issues (i.e. uncovered requirements) and possible 'Plan B' will be presented.
