BDI Commitments and Major Issues for Individual Instruments

Tuesday 24 January 2006 10:00 (20 minutes)

This presentation will state BDI responsibility and organisation for LHC individual instrumentation, i.e. intensity, emittance, tune, chromaticity... It will also present BDI commitments on the requirements listed in the 2 previous sessions. In particular, it will address the instruments' functionality and performance expected for the different operation stages and the procedures and tests foreseen to reach these objectives.

Finally, current major issues (i.e. uncovered requirements) and possible 'Plan B' will be presented.

Author: JONES, Rhodri (AB/BDI)

Presenter: JONES, Rhodri (AB/BDI)

Session Classification: Session 03 - The minimum workable LHC –providers' commitments
