BDI Commitments and Major Issues for Distributed Instrumentation

Tuesday 24 January 2006 09:30 (20 minutes)

This presentation will state BDI responsibility and organisation for LHC distributed instrumentation, i.e. beam position and beam loss systems. It will also present BDI commitments on the requirements listed in the 2 previous sessions. In particular, it will address the BPM and BLM functionality and performance expected for the different operation stages and the procedures and tests foreseen to reach these objectives.

Finally, current major issues (i.e. uncovered requirements) and possible 'Plan B' will be presented.

Primary author: HOLZER, Barbara (AB/BDI)

Presenter: HOLZER, Barbara (AB/BDI)

Session Classification: Session 03 - The minimum workable LHC –providers' commitments
