

## GridPP Ops 03/12/19

Attending: Matt, Mike Leech(Oxford), , Sam (Glasgow), Emanuele, Vip, Duncan, Daniela, James P, WinnieL , Linda Cornwall (RAL),Raul

Apologies: Gareth Roy [called away for Datacentre], David C

### Action from previous meetings.

\*190618-02 Raul, Duncan - form a plan for the future of perfsonar for GridPP sites. The spec was provided last week. Any feedback from people after feeding this to their suppliers?

\*191008-01 David C, plan a "Security Day" event.

[in progress DC]

Timescale ~ Feb 2020 (avoiding half term)

As a reminder; plan is currently to focus on central logging/central suspension and related topics

\*191119-01 - Sites mentioned in dzero ticket [143926](#) to remove dzero from publishing.

### VO Updates

Raja will go first this week.

Atlas (Elena):

UKI-SCOTGRID-GLASGOW

ggus 144155 Lost files at UKI-SCOTGRID-GLASGOW\_DATADISK

A problem with the initial declaration of files lost

ggus 144103 source transfer errors due to "no such file or directory"

Same as ggus 144155: A problem with the initial declaration of files lost

UKI-SOUTHGRID-SUSX

ggus 142329 State: on hold CentOS7 migration

Patrick is dealing with arc-CE

UKI-LT2-QMUL

ggus 144292 in assigned state: 0% transfer efficiency due to permission denied

It looks like the problem is fixed. The dashboard looks green.

UKI-SOUTHGRID-OX-HEP

ggus 144261 deletion fail with The requested service is not available at the moment.

The problem is fixed. The ticket is closed.

UKI-SOUTHGRID-BHAM-HEP

ggus 144034: reopened: Failovers on CERN backup proxy from UKI-SOUTHGRID-BHAM-HEP

Updated yesterday: those massive failovers from the same person (dn rjw(35064) Robert Ward) still appear.

ATLAS Software & Computing week, 2-6 Dec:

<https://indico.cern.ch/event/823341/>

CMS: (Daniela)

\* All sites green in monitoring; glitch at Bristol CE yesterday seems to be fixed.

\* The two CMS tickets (GGUS 144151 and [143553](#)) for Imperial are stalled. CMS production jobs are running if I unset the LD\_LIBRARY\_PATH for CMS by hand :-S

\* Brunel has a ticket about ([144246](#)) "a wrong file being served through xrootd". Looks firmly like a CMS rather than a site problem.

**LHCB:**

Sheffield : Two tickets opened - LHCb jobs not running for quite some time there. Could you update status please

Edinburgh : Failed / aborted pilots in the last few hours. - Rob reports there were overnight SGE issues, fixed.

RAL Tier-1 : Two tickets still open for file access / deletion on ECHO. Waiting for update from ECHO admins.

"Other" VOs:

DUNE :

glideInWMS configuration for the different sites :

<http://gfactory-2.opensciencegrid.org/factory/monitor/factoryEntryStatusNow.html>

Dune UK meeting yesterday.

LSST: Run ongoing, 70k jobs so far. IC working now. Investigating the higher failure rate than would like.

Oxford not seeing any jobs - James will send a job specifically their way.

New VO status:

## General Updates

NTR

## Meeting Updates

LHCB and ATLAS S&C weeks this week.

Atlas S&C: <https://indico.cern.ch/event/823341/>

## Tier 1 Status

No one to report. LHCB issue mentioned earlier.

Matt will see if the Tier 1 can send people to this meeting.

## Security Brief

No operation issues to report.

**Icmaps/argus is an ongoing theme - see the epic Sussex thread in TB-SUPPORT. A take home is that sites are not required to run argus - but they do need a way of banning the users on the central banning list.**

**Sussex problems in part due to ARC6 doing things in a new way.**

Gareth suggests using the quickstart. Warns that some versions pull stuff from the wrong repo, mixing ARC5 packages in there.

The latest version of the EGI UMD contains the version of frontier-squid with recent vulnerabilities fixed.

## Storage and Data Management News

DPM White Paper is still open for input - do it BY Friday, next discussion early that morning.

## On Duty Report

NTR

**Technical Update** (was Tier 2 evolution, Accounting, Monitoring, Documentation, Services)

Sussex lcms thing ongoing.

## AOB

It might seem a bit early to think about this, but when shall we break for Christmas?  
17th will be last meeting.

## Actions/Decisions from This Meeting

I did my PhD on D0. Awesome experiment :-)

Edinburgh this was our SGE falling over overnight, fixed now

@Daniela - agreed, it was the best Tevatron experiment.

Sorry we have to go to our annual department meeting.

This is what we use.

Simon F wrote it.

I don't think it's out of data, but for obvious reasons never tested with ARC6
