

The Large Hadron-Electron Collider at the HL-LHC

From resolving the partonic structure of matter to Higgs and BSM physics

LHeC Collaboration

Submitted to J.Phys. G

26.9.2019
Meeting
Physics Editors

1	Foreword	Herwig Schopper	5
2	Executive Summary	Oliver Bruening, Max Klein	6
3	Introduction	Max Klein	7
4	The Large Hadron Collider at High Luminosity	Oliver Bruening	8
4.1	The Accelerator - Parameters and Timeline	Oliver Bruening	8
4.2	Physics Expectations	Monica D’Onofrio	8
5	Main Characteristics of the LHeC	Oliver Bruening, Max Klein	9
5.1	Kinematics and Reconstruction of Final States	Max Klein	9
5.1.1	Nominal Beam Energies		9
5.1.2	Reduced Electron or Proton Beam Energy		9
5.2	ERL Baseline Configuration	Frank Zimmermann	9
5.3	LHeC Parameters	Max Klein	9
5.3.1	Choice of Electron Energy and Physics		9
5.3.2	Cost, Default Configuration and Staging		9
5.3.3	Parameters for Civil Engineering		9
5.3.4	Luminosity Parameters		9
5.3.5	LINAC Parameters		9
5.4	Operation Schedule	Oliver Bruening	9
5.5	Summary of Acceptance, Resolution and Calibrations	Peter Kostka	9
6	Precision Standard Model Physics with LHeC	Daniel Britzger, Fred Olness	10
6.1	Resolving the Parton Substructure of the Proton	Claire Gwenlan, Fred Olness	10
6.1.1	Simulated Data	Max Klein	10
6.1.2	PDFs from early LHeC Data	Claire Gwenlan	10
6.1.3	Complete Unfolding of PDFs	Claire Gwenlan	10
6.1.4	Strange Quark Density	Mandy Cooper Sarkar	10
6.2	Discovery through Precision QCD		10
6.2.1	Strong Coupling and Grand Unification	Claire Gwenlan and Daniel Britzger	10
6.2.2	New QCD Dynamics at Small x	Anna Stasto	10
6.2.3	Pinning Down the Low x Gluon with F_2 and F_L Measurements	Max Klein	10
6.2.4	Discovery of Saturation through PDF Analysis	Juan Rojo tbc	10
6.2.5	The 3D Structure of the Proton	Anna Stasto	10
6.2.6	Diffraction	Paul Newman	10
6.3	Electroweak Physics	Daniel Britzger	10
6.3.1	Neutral Current Couplings		10
6.3.2	Electroweak Parameters M_W , $\sin^2 \theta_W$, CKM		10
6.4	Top-Quark Physics	Christian Schwanenberger	10
6.4.1	Single and Pair Top Production in DIS		10

6.4.2	Wtq Couplings		10
6.4.3	FCNC Top Quark Couplings		10
6.4.4	Top Quark Measurements and Searches for New Physics		10
7	Nuclear Particle Physics with Electron-Ion Scattering at the LHeC	Nestor Armesto	11
7.1	Introduction	Anna Stasto	11
7.2	Nuclear Parton Densities	Nestor Armesto	11
7.3	Non-conventional Nuclear Partonic Structure	Anna Stasto, Paul Newman	11
7.4	New Dynamics at Small x with Nuclear Targets	Nestor Armesto	11
8	Higgs Physics with LHeC	Uta Klein, Bruce Mellado	12
8.1	Introduction	Max Klein	12
8.2	Signal strength determination in the leading decay channels	Max, Uta Klein	12
8.3	Htt Coupling Measurement	Bruce Mellado	12
8.4	Higgs Decay into Invisible Particles	Masahiro Kuze	12
8.5	Coupling Measurements	Jorge de Blas	12
9	Searches for Physics Beyond the Standard Model	Georges Azuelos, Oliver Fischer	13
9.1	Extension of the SM Higgs Sector	Oliver Fischer	13
9.2	SUSY	Monica D'Onofrio	13
9.3	Heavy Neutrinos and Feebly Interacting Particles	Oliver Fischer	13
9.4	Dark Matter and Dark Sector	Monica D'Onofrio	13
9.5	Contact Interactions and Leptoquarks	Georges Azuelos	13
9.6	Anomalous Triple Gauge Couplings	Orhan Carkir	13
10	The Influence of the LHeC on Physics at HL-LHC	Maarten Boonekamp	14
10.1	Precision Electroweak Measurements at the LHC	Maarten Boonekamp	14
10.2	Higgs Physics		14
10.2.1	Resolving QCD Uncertainties in pp Higgs Physics using LHeC	NN-Maarten?	14
10.2.2	Combined ep and pp Higgs Coupling Determinations	Jorge De Blas	14
10.3	Higgs pp+ep Results in the EFT Framework	Jorge De Blas	14
10.4	High Mass Searches at the LHC	Uta Klein	14
10.5	Heavy Ion Physics with eA Input	Nestor Armesto	14
11	The Electron Energy Recovery Linac	Erk Jensen, Gianluigi Arduini, Rogelio Tomas	15
11.1	Introduction - Design Goals	Gianluigi Arduini	16
11.2	The ERL Configuration of the LHeC	Alex Bogacz	16
11.2.1	Default Lattice		16
11.2.2	Lattice for 30 GeV		16
11.2.3	Component Summary		16
11.3	Electron-Ion Scattering	John Jowett	16
11.4	Beam-Beam Interactions	Andrea Latina, Daniel Schulte	16
11.5	Arc Magnets	Pierre Thonet, Cynthia Vallerand	16
11.6	LINAC and SRF	Erk Jensen	16
11.6.1	Choice of Frequency	Frank Marhauser	16
11.6.2	Cavity Prototype	Frank Marhauser	16
11.6.3	Dressed Cavity Design	Rama Calaga	16
11.6.4	Cavity-CryoModule	Sebastien Bousson and Gilles Olivier	16
11.6.5	Sources	Boris Militsyn, Matt Poelker	16
11.6.6	Injector	Oliver Bruening	16
11.6.7	Compensation of Synchrotron Radiation Losses	Alex Bogacz	16
11.6.8	LINAC Configuration and Infrastructure	Erk Jensen	16
11.7	Interaction Region	Gianluigi Arduini, Bernhard Holzer, Rogelio Tomas	16

11.7.1	Layout	Bernhard Holzer, Rogelio Tomas	16
11.7.2	Electrons	Kevin Andre	16
11.7.3	Protons	Emilia Cruz Alanis	16
11.7.4	Triplet Magnet Design	Stefan Russenschuck, Brett Parker	16
11.8	Civil Engineering	Alexandra Tudora, John Osborne	16
12	The ERL development facility PERLE at Orsay	Walid Kaabi, Max Klein	17
13	Experimentation at the LHeC	Paul Newman, Peter Kostka	18
13.1	Introduction	Paul Newman	18
13.2	Main Detector Elements		18
13.2.1	Magnets	Hermann ten Kate	18
13.2.2	Machine-Detector Interface, Beam Pipe and Radiation	Peter Kostka	18
13.2.3	Inner Tracking	Peter Kostka	18
13.2.4	Calorimetry	Peter Kostka	18
13.2.5	Muon Detector	Alessandro Polini	18
13.3	Central Detector Performance	Peter Kostka	18
13.4	Forward and Backward Detectors	Paul Newman	18
13.5	Detector Installation and Infrastructure	Andrea Gaddi	18
14	Conclusions	Oliver Bruening, Max Klein	19
14.1	Summary	Max Klein	19
14.2	Timeline and Future Project Development	Oliver Bruening	19
15	Appendix A: Electron-Hadron Scattering with $E_p=20$ TeV	Monica D’Onofrio	20
15.1	Introduction	Monica D’Onofrio	20
15.2	Performance Parameters	Frank Zimmermann	20
15.3	Physics Interest - Case Studies		20
15.3.1	FCC-hh at 40 TeV: SM and BSM	Maarten Boonekamp, Monica D’Onofrio	20
15.3.2	ep at 2.2 TeV cms: PDFs and Higgs	Claire Gwenlan, Max Klein, Jorge De Blas	20
15.4	Attaching the ERL to a 100 km Hadron Ring		20
15.4.1	Scaling the IR	Bernhard Holzer	20
15.4.2	Civil Engineering around point L	Alexandra Tudora	20
15.5	Scaling the LHeC Detector Design to Higher Proton Energies	Peter Kostka	20
16	Appendix B: Development of Energy Recovery Linac Technology - Status and Prospects		
	Chris Tennant		21
17	Appendix C: Technology and Applications	Max Klein	22
17.1	The Electron Recirculator as an Injector for FCC-ee	Roberto Corsini	22
17.2	High Energy Photo-Nuclear Physics with the LHeC	Norbert Pietralla	22
