High-Available Samba setup for CERNBox

Monday 3 February 2020 15:10 (5 minutes)

This is a short talk to give the status of our High-available Samba setup in front of CERNBox/Eos.

Deployed in production in September 2019, its role is becoming more and more critical as a larger Windows-based user community moves to CERNBox, following the planned phase-out of DFS at CERN.
