EOSHOME Backup Update

Monday 3 February 2020 11:35 (5 minutes)

EOS Home (CERNBox) has now more than 20K users and projects spaces which need to be backed up every day. In order to improve our current backup system, we developed a distributed backup/restore system based on opensource tool restic which stores backup data on CERN S3 service. We are presenting an update on the current status of the project and future challenges.
