

TIPP 2020

Tuesday, 26 May 2020

Sensors: Solid-state calorimeters: Block 1 (11:00 - 12:30)

time	[id] title	presenter
11:00	[110] Superconducting Tunnel Junction Radiation Detectors for Nuclear Science	
11:18	[196] Superconducting Nanowires for Detectors and Cryogenic Electronics	
11:36	[203] BULLKID - Bulky and low-threshold kinetic inductance detectors	
11:54	[219] Towards an Amorphous Selenium CMOS Imager for a $\beta\beta$ Search	
12:12	[221] Counting electrons with the DAMIC-M dark matter experiment
