

**Session Program**

**24-29 May 2020**

**TIPP 2020**

***Experiments: rare process***

# Wednesday 27 May

16:00

## Experiments: rare process: Block 1

**Session** | **Location:** Whistler Conference Centre 4010 Whistler Way, Whistler, BC V8E 1J2 CANADA

16:00-16:18

**A High Efficiency Cosmic Ray Veto Detector for the Mu2e Experiment at Fermilab**

16:18-16:36

**The Mu2e experiment: a search for charged lepton flavor violation in muon to electron conversion**

16:36-16:54

**The RICH detector of the NA62 experiment at CERN**

16:54-17:12

**ALPHA-g: a measurement of antimatter gravity at CERN**

17:12-17:30

**Ultracold neutron spin analysis - Counting uncharged particles and binning them according to their spin direction**

17:30
