

Session Program

24-29 May 2020

TIPP 2020

Experiments: Space and particle astrophysics

Wednesday 27 May

14:00

Experiments: Space and particle astrophysics: Block 1

Session | **Location:** Whistler Conference Centre 4010 Whistler Way, Whistler, BC V8E 1J2 CANADA

14:00-14:18

A new gamma-rays all sky monitor for multimessenger astronomy: the Crystal Eye

Speaker

Felicia Carla Tiziana Barbato

14:18-14:36

A compact low threshold gamma-ray detector composed of LaBr3 and SiPMs for GECAM

14:36-14:54

A Camera for the Small Sized Telescopes of the Cherenkov Telescope Array

14:54-15:12

The Radio Neutrino Observatory in Greenland

15:12-15:30

Pathfinders for the Pacific Ocean Neutrino Experiment

Speaker

Christian Spannfellner

15:30
