CERN Tape Archive status and plans (Remote)

Wednesday 11 March 2020 13:50 (20 minutes)

CTA is designed to replace CASTOR as the CERN Tape Archive solution, in order to face scalability and performance challenges arriving with LHC Run-3.

This presentation will focus on the current CTA deployment and will provide an up-to-date snapshot of CTA achievements.

It will also cover the final Run3 CTA Service architecture and underlying hardware that have been deployed at the end of 2019.

Presenter: LEDUC, Julien (CERN)

Session Classification: Technical Discussions
