## **A whole world lies between quantum non-locality and communication.**

*Saturday 5 September 2020 12:15 (25 minutes)*

We consider a hierarchy of classical and quantum correlations for multiple agents restricted in their ability to signal to each other.

This work surveys the definitions of several non-locality classes (classical and quantum) and their relations. Existing results will be framed into a unified context and future of research will be outlined.

### **Internet talk**

#### **Is this abstract from experiment?**

No

#### **Name of experiment and experimental site**

N/A

#### **Is the speaker for that presentation defined?**

Yes

### **Details**

Prof. Claude Crépeau, McGill University

**Primary author:** CREPEAU, Claude (McGill University)

**Presenter:** CREPEAU, Claude (McGill University)

**Session Classification:** Semiplenary
