Search for rare decays of the observed Higgs boson and additional Higgs bosons with the ATLAS detector

Monday, 7 September 2020 11:50 (25 minutes)

The unprecedented amount of data recorded by the ATLAS experiment during the LHC pp collision run at 13 TeV allows to search for rare decays of the Higgs boson. In addition, the sensitivity of searches for additional Higgs bosons is highly increased. The latest results on these topics will be presented.

Is this abstract from experiment?

Yes

Is the speaker for that presentation defined?

Yes

Name of experiment and experimental site

ATLAS, <http://atlas.cern/>

Internet talk

Yes

Details

Tomomi Kawaguchi

Primary authors: ATLAS COLLABORATION; KAWAGUCHI, Tomomi (Nagoya University (JP))

Presenter: KAWAGUCHI, Tomomi (Nagoya University (JP))

Session Classification: Plenary
