

Higgs boson production in association with a $t\bar{t}b\bar{b}$ pair at the ATLAS experiment

Thursday, 30 July 2020 10:54 (18 minutes)

The measurement of Higgs boson production in association with a $t\bar{t}b\bar{b}$ pair is essential to understand the top-quark couplings to the Higgs boson. This talk presents the analyses using Higgs boson decays to $b\bar{b}$ pairs, to two Z bosons, to other multi-lepton final states, and to a pair of photons, using pp collision data collected at 13 TeV.
