

# Studies of b-hadrons at LHCb

*Wednesday, July 29, 2020 5:05 PM (15 minutes)*

The large dataset collected during Runs I and II of the LHC has opened new possibilities to study singly heavy b-hadron states and broaden knowledge of their spectroscopy and production. Recent results on searches for new excited b-hadron states, and studies of b-hadron production, will be presented.
