

CEPC Accelerator Towards TDR

Wednesday, July 29, 2020 4:10 PM (20 minutes)

In Nov 2018, CEPC CDR was completed and released publicly. In May 2019 CEPC strategy plan was submitted to European high energy physics strategy meeting for discussion. Since the formal entering into the CEPC accelerator TDR phase, many progresses have been made in optimization designs, hardware R&D, industrialization, such as high efficiency klystron, SC accelerator system, magnets, vacuum system, civil engineering, site selection, CIPIC industry collaboration, international collaboration, etc, which will be reported in this talk.

Secondary track (number)

Primary author: GAO, Jie (Institute of High Energy Physics, China)

Presenter: GAO, Jie (Institute of High Energy Physics, China)

Session Classification: Accelerator: Physics, Performance, and R&D for Future Facilities

Track Classification: 11. Accelerator: Physics, Performance, and R&D for Future Facilities
