WLCG Privacy Notice

- Was approved in summer 2019
- http://wlcg-docs.web.cern.ch/wlcg-docs/?dir=policy/security
- This needs to be shown on every web page offering a WLCG service
  - Or service needs to prepare its own – if general one does not work
  - Including all experiment services too
- I have not (yet) found **any** WLCG service advertising the Privacy Notice (including VOMS)
  - GOCDB does have its own privacy notice
- Julia has a list of all services needing a PN
  - Should "operations" now do a deployment campaign?

Personal Data Policy Framework

- The old framework still applies
  - https://wlcg.web.cern.ch/computer-security

- Processing of Personal Data Policy Framework
  - *https://docs.google.com/document/d/1X6m8FhLHH3qe5plWOZQYoYJKt_z6oHJo6euDB1Y3e6s/edit*
- Lots of discussion at June/July GDB meetings
  - But was never finalised
  - We were asked to concentrate on Privacy Notice
- We have been waiting for the new GEANT DP Code of Conduct version 2
  - Close to being submitted for approval (true?)
  - But could still some (long?) time before approval is given
- Conclude: policy group should return to finalising the updated version of the policy framework

Policy on the Processing of Personal Data (reminder)

Issues

- Why do we say "fairly, open and transparent"?

- Retention length (18 months)?

- User rights of access

- Where do we report data breaches?

- Are audits required?

- Dual meaning of word "processing"
