COVID-19 impact on PIC Operations

Spain is currently under **<u>alarm state</u>**:

- Mobility is allowed to go to supermarkets, pharmacies, and workplaces
- Teleworking is encouraged, if possible

PIC staff is working from home, since a few days:

- Additional internal communication channels have been enabled for this period
- Tier-1 and ATLAS Tier-2 operations are fully supported
- If we need to go physically to the site, it is still possible, coordinating first with the University security responsibles
- Yesterday's downtime was done fully remote (HTCondor and dCache upgrades)

* PIC personnel and relatives are fine. Take care of yourself and take care of yours!
