

Session Program

19 February 2020

10th LHC students poster session

Heavy Ion Collisions

CERN, 61/1-201 - Pas perdue - Not a meeting room -

Wednesday 19 February

17:02

Heavy Ion Collisions

Session | **Location:** CERN, 61/1-201 - Pas perdue - Not a meeting room -

17:02-17:03

Measurement of J/psi polarization in Pb-Pb collisions at $\sqrt{s_{NN}} = 5.02$ TeV with ALICE

Speaker

Luca Micheletti

17:03-17:04

Measurement of D^{*+} -meson production in Pb-Pb collisions at $\sqrt{s_{NN}} = 5.02$ TeV with ALICE

Speaker

Syaefudin Jaelani

17:04-17:05

Shaping the Quark-Gluon Plasma with flow measurements in ALICE

Speaker

Mihaela Gabriela Besoiu

17:05-17:06

Multiplicity dependence of light (anti-)nuclei production with ALICE

Speaker

Alessandro Balbino

17:06-17:07

Measurement of (anti-)hypertriton production in Pb-Pb collisions with ALICE using machine learning techniques

Speaker

Francesco Mazzaschi

17:07-17:08

ALICE measurements of ρ^0 photoproduction in ultra-peripheral Pb-Pb collisions

Speaker

David Horak

17:08-17:09

Studies of Strange and Non-Strange Beauty Productions in PbPb Collisions with the CMS Detector

Speaker

Zhaozhong Shi

19:00
