

A large, ornate silver trophy with a faceted, crystalline design is being held by several hands. The trophy is highly reflective, showing distorted reflections of the sky and the hands holding it. The background is a clear, bright blue sky. The trophy has a wide, flared base and a central, multi-faceted body that tapers slightly towards the top. The hands are positioned around the trophy, with some gripping the base and others supporting the sides. The lighting is bright, creating strong highlights and shadows on the metallic surface.

— Awards for the best poster

- **NINA BURLAC**, searching for neutrinoless double beta decay with **LEGEND** experiment
- **GIULIA PIERAMICO**, geant4 simulation of the **ABALONE** photosensor
- **MAXIME PIERRE**, neutrinoless double beta decay search in **XENON1t/nt**

— Awards for the most active students asking questions and making comments

- ROBERT HAMMANN
- FRANCESCO POPPI
- GIOVANNI VOLTA
