

# CS3MESH – Ivan's stream of thoughts

- ◆ {own|Next}cloud, Seafile, Pydio, *whatever*:
  - ✦ Do all agree on interoperability?
  - ✦ Degree of commitment?
  - ✦ Formal agreement?
- ◆ CS3 APIs: anything existent to adopt/adapt?
  - ✦ How to participate in the design?
- ◆ Early adopters:
  - ✦ Data first. Let's forget about apps for now
  - ✦ Coordination – platform islands? Roles?
- ◆ Authentication: SSO?
  - ✦ Email to identify the users?
  - ✦ Or no central authentication?
