Electroweak SUSY in leptonic final states with the CMS detector

Tuesday, 24 August 2021 22:30 (20 minutes)

Results from the CMS experiment are presented for electroweak production of supersymmetric partners with decays to leptonic final states. The searches use proton-proton collision data with luminosity up to 137 fb⁻¹ recorded by the CMS detector at center of mass energy 13 TeV during the LHC Run 2.
