Searches for third generation squarks with the CMS detector

Monday, 23 August 2021 22:55 (20 minutes)

Results from the CMS experiment are presented for searches for supersymmetric stop and sbottom production. A variety of final state decays are considered with an emphasis on targeting difficult to reach kinematic regions. The searches use proton-proton collision data with luminosity up to 137 fb^{-1} recorded by the CMS detector at center of mass energy 13 TeV during the LHC Run 2

Presenter: SMITH, Caleb James (The University of Kansas (US))

Session Classification: Supersymmetry: Models, Phenomenology and Experimental Results

Track Classification: Supersymmetry: Models, Phenomenology and Experimental Results
